Lean Shop Management System

"The secret to getting more jobs done faster"

Serving manufacturers struggling with growth and profitability.

WIP Scheduler | Manufacturing Planning and Control

Lean Shop Management System (LSMS) is a Lean flow manufacturing system focused on increasing throughput, reducing waste, maintaining quality and driving out stress at every step!

LSMS is a total management solution designed for sign shops, print shops and custom manufacturers.

You'll get everything you need to be producing more jobs faster in 12-weeks or less including visual scheduling that facilitates everyone's involvement and the desperately needed communication throughout the shop, proprietary planning, scheduling and tracking tools, customizable forms and reports, process guides for training your people, and a plan for continuous improvement.

In addition you learn the steps to implementing the program with examples and coaching to help you apply it to your situation... and much more.
